

March 1, 1976

same problem.

SENATOR MURPHY: If there are, Senator Duis, I would be most welcome to have them as a friendly amendment.

SENATOR DUIS: Thank you. Just a moment. Senator Savage said there is one in Omaha now that they are having trouble getting...I would prefer that he brought this matter up to you himself but thank you for your answer to me.

SENATOR MURPHY: Fine. Thank you.

PRESIDENT: Senator Savage.

SENATOR SAVAGE: Senator Murphy, there is a young man in Omaha now who is a ward of the court at Hastings, Nebraska. He has two...he was born both blind and deaf and he came into Hastings. He had a foster parent at Hastings. They had to give him a new foster parent in Omaha and they delayed his payment on his schooling for almost a month. Finally, they got the run of it. The foster parents at Hastings want him back in the summertime so they have been kicking that kid around for thirty days trying to find out who is going to pay the bill, whether Hastings is going to pay it or whether the Omaha schools are suppose to pay it and that is the one I was referring to.

SENATOR MURPHY: And of course, this is the problem I have run into, Senator Savage. I, personally, have contacted the Department several times. The school district submits its bill and they simply sit there and look at them and I think two years is far too long for this kind of a situation to exist.

SENATOR SAVAGE: They just keep passing the buck.

PRESIDENT: Senator Nichol.

SENATOR NICHOL: Mr. Chairman, I, too, have a small school district in my area that has six. A family moved in with eight children and six of them have a problem. We are talking about 1975 now, as I understand it, and this also is a problem but I didn't know we could attach this on to this bill. Senator Frank Lewis, I guess I would ask the question of you, if those of us who do have a problem, is it possible to attach this loss onto this bill or not? I am just asking a question.

SENATOR F. LEWIS: Mr. Chairman, our in state wards are already taken care of. The problem we have, and Senator Murphy is right, he has got eight. Senator Savage, there is fifteen in Omaha. There is...I can't remember the total number but we are dealing with about forty to forty-five students. There is some out in the southern border of Nebraska, I think the McCook area there, because they have come over from Kansas so I would say we are talking forty, forty-five students.

SENATOR NICHOL: I guess my question is this, if those students have not been recorded and they still have a claim, could this be included in this bill?
